## WSEU Assistant Technical Director-Male Programs

WSEU is pleased to announce that **Adam Mooi** has assumed the role of **Assistant Technical Director-Male Programs** as of February 2017.

Adam has been with WSEU in a staff role since October 2014. Adam has made valuable contributions to the Club as a team coach and technical trainer, building our technical resources for coaches and players - including launching the WSEU YouTube channel - and supporting the expansion of the WSEU Academy Team program. Adam holds a Provincial B-License and is working toward his National B-License at the same time as an undergraduate degree at the University of Manitoba.

Adam's playing career includes attending the National Development Centre (NDC) program at Glenlawn Collegiate, time with Bonivital Soccer Club, five years with Manitoba's Provincial Team Program (four of those holding the honour of team captain), the 2013 Manitoba Canada Games team and the Lucania FC men's team (MMSL premier division).

Adam works under the direction of **Hadyn Sloane-Seale, Technical Director** supporting players and coaches at the premier, developmental, recreational and mini level in the WSEU district. Along with **Amy Harrison, Assistant Technical Director-Female Programs**, Adam will lead WSEU's Academy Program and support the delivery of Club and district events throughout the year.

"Adam has worked extremely hard in his time at WSEU and has helped to expand our technical resources. I look forward to his contributions in his expanded role. Rounding out our technical team, Adam and Amy together will help WSEU continue to improve our offering to premier and developmental players as well as expand our support and outreach to the recreational and mini programs. They both bring a great attitude and a strong work ethic to the office and the field each day. We are fortunate to have them at WSEU," shared Hadyn Sloane-Seale, Technical Director.

"The WSEU Board of Directors are excited about the expansion of our technical team and what that ultimately means for the growth of the game in our district. Continued commitment to our technical programs helps evolve and improve what we are able to offer our players, coaches and families at ALL levels of soccer," said Dale Friesen, President, WSEU Board of Directors.
